## **Add Icons to Elements**

- Step 1 Select an icon you want
- Step 2 Drag and drop an Element you need
  - Buttons
    - Tab Bars and Lists Swipes

You can add icons to the following Elements - Buttons, Tab Bars, List & Swipes. If you need to add this within any other Constructor Element/Component, you can use a simple button.

For example, in the Sample Design App in your account such icons are used to create the bottom Menu and the Delete button.

## Step 1 - Select an icon you want

Go to the Font Awesome icon catalog and find the one you need - https://fontawesome.com/icons?d=gallery

Select the icon you need and click on the green area to copy the icon's html class into your PCs buffer.

Brands Style (fab) • 🛧 • f6af • <i class="fab fa-acquisitions-incorporated"></i> • 🖧

Note - "acquisitions bla bla bla" is just a name of an opened icon/

Step 2 - Drag and drop an Element you need

Again, this works for Buttons, Tab bars, Lists & Swipes:

## **Buttons**

At the Properties tab (marked green ) select the Icon Class (marked red ) and just PASTE your buffer from Step 1 into it.

Backendname button-ocb4846a Caption Button design Flat Button rounding Round (icon only)	Properties of Button	우	X
Caption Caption Button design Flat  Button rounding Round (con only)  Con class ③ Tas fa-home Button fayout Inline icon  tcon inline position	Backendname		
Button design Flat  Button rounding Round (icon only)  toon class ⑦ fas fa-home Button layout Inline icon  toon inline position	button-ocb4846a		1
Flat     •       Button rounding     •       Round (con only)     •       Icon class ⑦     •       fas fa-home     •       Button fayout     •       Inline icon     •       tcon inline position     •	Caption		
Flat     •       Button rounding     •       Round (con only)     •       Icon class ⑦     •       fas fa-home     •       Button fayout     •       Inline icon     •       tcon inline position     •			
Button rounding Round (icon only)  Con class ⑦  fas fa-home Button fayout Inline icon  toon inline position	Button design		
Round (icon only)     •       Icon class ⑦     •       fas fa-home     •       Button layout     •       Inline icon     •       tcon inline position     •	Flat	٥	
Icon class ② fas fa-home Button layout Inline icon tcon inline position	Button rounding		
fas fa-home       Button layout       Inline icon       Icon inline position	Round (icon only)	٥	
Button layout Inline icon Con inline position	Icon class @		
Inline icon e Icon inline position	fas fa-home		
Icon inline position	Button layout		
	Inline icon	¢	
Rear text +	Icon inline position		
	Near text	\$	

You will see your icon name appear in Properties and the icon itself on the screen.

## **Tab Bars and Lists Swipes**

At the Properties tab click needed element of the Tab or List, marked Red :

Properties of Tabbar	25	
Backendname		
tabs-ccdddd90		
Direction		
Horizontal	\$	
Tabbar position		
Top \ Left	\$	
Active tab

TabPanel - 2	ញា	
	6	
ADD ITEM		

Or you can click the tab itself (marked green )

Now you can add an icon to each tab or list of your element - marked red
